

# Retractable Screens

## Sill Guard - Threshold Transition

( Optional )

Protects the screen track.

Provides an efficient transition.

The overall width is 2-1/8".

The width of the exposed sill guard (ramp) is 1-1/4".

They are generally installed for hinge door applications.

(Rarely used for sliding doors)

### Profiles of Bottom Guide Rail With Sill Guard Threshold Transition

### For Recess Mount Only

Before screwing down the Bottom Guide Rail, you may choose to install the Sill Guard Threshold Transition (with Threshold Transition End Caps).

This part is optional and it protects the bottom guide rail and it is also a nice aesthetic feature. The Transition may be installed toward the interior, exterior, or on both sides.

To install, cut the Transition to the door opening width, less 4-1/4"(114mm) for Single Door Screens.

Insert the F-Threshold Transition End Caps, slide the lip of the Transition under the Bottom Guide Rail and secure both profiles with three (3) M-#8 x 3/4"(19mm) Phillips Panhead Screws.

Position screws 6 inches in from each end and one in the center.
